Jack Donohue

WORK EXPERIENCE

Quantitative Analyst: Graduate Intern

Wells Fargo   06/2023 – 08/2023

- Realized a 20% decrease in inference engine run time, via code profiling, timing experiments, and data sampling.
- Collaborated across the model development pipeline for the loss forecasting of 100% of the bank's credit card portfolio, with the development team.
- Leveraged technologies such as distributed clusters, Linux, Spark, and Hadoop to analyze credit card portfolio data statistically.

Material Physics Capstone Research

University of Virginia   05/2023 – 08/2023

- Developed Keras Tuner optimization neural networks that led to ~60% more accurate algorithms through the use of loss functions, layer architectures, transfer learning, cross-validation, and tuning hyper-parameters; as the lead on algorithm optimization.
- Achieved an accuracy 10% better than the stated goal set by the research sponsor, through the collaboration of the research team.
- Obtained 87.1% reduction in data complexity by applying Gaussian mixture models to the target features leading to faster training and inference times without loss of performance.

Paratrooper & Non-Commissioned Officer

US Army Airborne   07/2013 – 07/2018

- Promoted 5x in 5 years to the rank of Sergeant serving as a team member and ladder of an airborne infantry platoon.
- Mentored 2 junior soldiers through the assessment and promotion process to Non-Commissioned Officer, as a team leader.
- Managed aircraft load planning as an Air Movement Officer.
- Won 1st place in Battalion Soldier of the Month competition, representing a company of ~100 paratroopers.
- Completed 28 parachute jumps in 5 different countries.

PROJECTS

Bayesian Classification of Forgeries   10/2022

- Attained exceptional ~90% accuracy in classifying bank notes, identifying forgeries using PyMC's probabilistic programming language and Bayesian Machine Learning methods.

Natural Language Processing   08/2023

- Engineered neural networks, with 0.09 validation loss, to evaluate student writing.
- Scored the main idea, clarity, precision, and fluency; aiding teachers and educational platforms in real-time evaluation and feedback.

- Please refer to the [Portfolio Website](#) for all personal projects.

SKILLS

Technical Skills:
- Data Science
- Machine Learning
- Deep Learning
- Computer Vision
- Big Data Systems
- Natural Language Processing
- Feature Engineering
- Exploratory Data Analysis
- Quantitative Analytics
- Extract, Transform, Load (ETL)
- Data Visualization
- Statistical Modeling

Tools and Software:
- Python (Programming Language)
- Linux / Bash
- Numpy
- Scipy
- Sci-kit Learn
- Tensorflow
- Keras
- Seaborn
- Plotly
- Jupyter
- Spark
- Hadoop

EDUCATION

University of Virginia
Master of Science
Data Science
Charlottesville, VA — 08/2023
3.84 / 4.0 GPA

Fordham University
Bachelor of Science
Business & Finance
New York, NY — 12/2021
3.7 / 4.0 GPA

Awards:
- Cum Laude
- Dean's List
